**1. INTRODUCTION TO ACTIVE SERVER PAGES** 1

Introduction 1  
Programming and the Web Server 1  
What is Active Server Pages (ASP)? 3  
ASP Objects and Components 5  
Basics of ASP 5  
Variables in VBScript 7  
Conditional Programming 10  
Case Constructs 11  
Looping Constructs 12  
Choice of Scripting Languages 14  
Setting up the ASP Applications 15  
Resources and Information on the Internet 16

- Summary 17
- Test Yourself 17

**2. ACTIVE SERVER PAGES AND HTTP** 19

The Response Object 20  
Buffering Page Output 21  
Caching and ASP 23  
Is the Client Still There? 25  
Specifying Content-Type Sent to the Browser 25  
Status Codes 27  
Redirection to Another Page 27  
The Request Object 28  
The QueryString Collection 29  
The Form Collection 32  
The ServerVariables Collection 34  
Cookies and ASP 36  
Creating Cookies 36  
Retrieving Cookies 37  
Including files in ASP 39

• Summary	40
• Test Yourself	41
• Practice Exercise	42
<b>3. APPLICATIONS AND SESSIONS</b>	<b>43</b>
What is an Application?	43
The Global.asa File	43
The Application Object	45
Application Collections and Methods	46
An Introduction to Sessions	50
Session Variables	50
Does the Session End Automatically?	51
The Global.asa File and Sessions	53
The Mechanics of Sessions	54
• Summary	55
• Test Yourself	55
• Practice Exercises	56
<b>4. FORM PROCESSING WITH ASP</b>	<b>57</b>
Using Text Boxes and Text Areas	58
Using Radio Buttons	60
Using Check Boxes	62
Select Lists and ASP	64
A Feedback form Example	65
Uploading Files Using ASP	69
• Summary	71
• Test Yourself	71
• Practice Exercises	72
<b>5. ACTIVEX COMPONENTS</b>	<b>73</b>
Instantiating Components	73
The FileSystemObject Component	74
File I/O in ASP	75
The TextStream Object	76
The File Object	80
The Drive Object	83
The Folder Object	85
The Web Browser Capabilities Component	88
The Ad Rotator Component	90
Building Your own Components with Visual Basic 5.0	93
The 'Even I can Build a Component' Component Example	93
• Summary	96
• Test Yourself	96
• Practice Exercises	97

<b>6. DATABASE INTERACTION WITH ASP</b>	<b>98</b>
An Introduction to ActiveX Data Objects (ADO)	98
A Brief Architecture of ActiveX Data Objects	99
Creating a Microsoft Access Database	100
Creating a Microsoft SQL Server Database	103
Creating Your Very First ADO Page	104
Creating a Connection Using OLE DB	106
Creating a Microsoft Data Link Connection	106
Inserting Data into a Table	108
Updating Data in a Table	109
Deleting Data from a Table	110
Understanding and Using Transactions	111
• Summary	113
• Test Yourself	113
• Practice Exercises	114
<b>7. THE RECORDSET OBJECT</b>	<b>115</b>
Understanding Cursors	115
Understanding Database Locking	116
Retrieving Number of Records	118
Iterating through a Recordset	118
Paging through a Recordset	120
Adding a Record	124
Batch Updating Records	125
Updating a Record	126
Deleting a Record	127
Retrieving Records into an Array	127
The Fields Collection	128
• Summary	131
• Test Yourself	132
• Practice Exercise	132
<b>8. THE COMMAND OBJECT</b>	<b>133</b>
What are Stored Procedures?	133
Creating a Stored Procedure	134
Stored Procedures with Parameters	135
Stored Procedures and the Command Object	136
The Command Object	137
Return Codes and the Command Object	138
Using the Command Object with Input Parameters	139
Using the Command Object with Output Parameters	141
Retrieving Parameter Information from a Stored Procedure	142
• Summary	144

• <i>Test Yourself</i>	145	
• <i>Practice Exercise</i>	145	
<b>9. ACTIVE SERVER PAGES AND EMAIL</b>		<b>146</b>
The SMTP Service	146	
Configuring the SMTP Service	146	
Working of the SMTP Service	147	
CDO for NTS	148	
Sending Attachments with email	150	
Email Priorities	151	
Sending HTML Content	152	
Retrieving email	152	
• <i>Summary</i>	154	
• <i>Test Yourself</i>	154	
• <i>Practice Exercises</i>	154	
<b>10. ASP AND SECURITY</b>		<b>155</b>
Server Protection	155	
User-level Access	155	
Securing Your Database	156	
Secure Transactions	157	
SSL and Encryption	157	
SSL and Authentication	158	
SSL and Data Integrity	158	
Generating a Certificate Request	158	
Installing the Server Certificate	159	
SSL and Active Server Pages	159	
Implementing Security with ASP	160	
Security Using Windows NT	168	
Security Using Internet Information Server	169	
Retrieving Username and Password Using ASP	170	
• <i>Summary</i>	171	
• <i>Test Yourself</i>	171	
<b>11. SAMPLE ASP APPLICATIONS</b>		<b>173</b>
A Simple Calendar	173	
A Notice Application	176	
Bulletin Board Service (BBS)	186	
• <i>Summary</i>	201	
• <i>Practice Exercise</i>	201	
<b>12. WORKING WITH VISUAL INTERDEV</b>		<b>202</b>
Installing and Setting up Microsoft Internet Information Server 4.0	202	

Creating a Web Application	204	
• <i>Summary</i>	213	
<b>13. OPTIMIZING ASP SCRIPTS AND TROUBLESHOOTING</b>		<b>214</b>
Optimizing HTML Pages	214	
Avoid Frames	215	
Using Tables	215	
Database Performance	216	
Setting Database Indexes	217	
Using Stored Procedures	217	
Optimizing ASP Performance	217	
Avoid Using Session Variables	218	
Avoid Buffering Output	218	
Scenarios of Error in ASP	218	
Apostrophes in Insert SQL Statements	219	
Storing Data to Large Text Fields	219	
• <i>Summary</i>	222	
<b>14. CASE STUDY: ONLINE LIBRARY</b>		<b>223</b>
Introduction	223	
Getting Ready	223	
The Application	224	
The User Module	225	
The Admin Module	282	
<b>Appendix–A: Object Reference</b>		<b>310</b>
<b>Appendix–B: Component Reference</b>		<b>316</b>
<b>Appendix–C: ADO Reference</b>		<b>323</b>
<b>Appendix–D: VBScript Reference</b>		<b>335</b>
<b>Appendix–E: Net and ASP.Net</b>		<b>387</b>
<b>Appendix–F: Internet Information Server 5.0</b>		<b>390</b>
<b>Index</b>		<b>398</b>
<b>ASP 3.0 Companion CD Contents</b>		<b>404</b>

# DISCOVER ASP 3.0

Designed for beginners to ASP, this book aims to provide a starting point for learning Microsoft ASP 3.0. Discover ASP 3.0, is an easy to read, comprehensible guide for all those who want to learn how to embed interactivity and dynamic components into a web site.

The book begins with Introduction to Active Server Pages, its features and capabilities and takes the reader from creating a simple ASP page to the development of full-fledged ASP-based applications.

## Salient Features

- ◆ 5 useful appendices on ASP Object Reference, ASP Component Reference, ADO Reference, VBScript Reference, ASPNet and IIS 5.0.
- ◆ A chapter on installing and using IIS 4.0 and working with Visual InterDev.
- ◆ IIS 5.0 covered in an appendix.
- ◆ Carefully selected design examples that demonstrate the common problems faced during real life project implementation.
- ◆ A comprehensive project illustrated at the end to give the reader a complete overview of ASP.
- ◆ Chapters on Security issues and Troubleshooting tips.

## Pedagogy Rich

- ◆ Chapter Introductions and Summary
- ◆ 118 programming examples
- ◆ 146 test yourself and programming exercises.
- ◆ Programming tips and notes
- ◆ Resources on the Internet as 'References'.

### CD Contains

*Numerous applications, utilities, resources and components provided in the companion CD including Hit Counter, Chat, ASP Wizard, Easy ASP, Gasp 2.0, Tiny Web Server, vWeb Server etc.*
